

Position on Gift Designation and Reassignment

- It is the position of International Teams that any donation given by a ministry partner in response to an appeal for a specified project will be used for that purpose. The ministry will begin to put the funds to work on that specified project in a timely manner--normally within twelve months. In the event that the designated project is fully funded, delayed or canceled, the excess funds will be reassigned to a ministry need most closely identifying with the project for which the funds were originally given.

- The ministry will review gifts given by a ministry partner for an express, designated purpose, to determine if the purpose can be achieved. If the gift is accepted, the funds will be used for the designated purpose.

- With appeals for projects, International Teams will seek to disclose this position on accompanying material, while notifying the ministry partner, in advance, of the organization's position. The final re-designation from an appeal for a gift rests with International Teams and the Board of Directors.
